Time to breath

Situated at the end of the valley, Gargellen and its mountains **in summer** offer cross-border hikes into Switzerland with an authentic alpine backdrop. Those who want to take the vertical route may attempt the Gargellner Köpfe via ferrata. And for those who prefer not to walk from Schafberg Hüsli into the valley, mountain carts and a 6 km descent await.

In winter snow crystals whirl through the fresh, clear air. The groomed slopes are ready for the first turns of the day! In spring, when the sun shines strongly after an icy cold night and the snow crystals begin to melt on the surface, it is firm time in Gargellen - a very special experience, especially on touring skis.
